

Program Admin Design System

Official UI Reference Guide

This document serves as the official UI reference for the Program application, covering the Admin, Super Admin, Instructor, and Student portals. It is based entirely on the existing codebase implementation. Every future page must adhere to these guidelines to ensure a consistent, professional, and visually stunning experience.

1. Design Philosophy

The Program application utilizes a **Modern Glassmorphism** design language. The aesthetic is premium, clean, and highly interactive.

- **Glassmorphism:** Heavy use of transparent backgrounds (rgba colors) combined with background blur (`backdrop-filter: blur(20px)`).
- **Soft Borders & 3D Lighting:** Cards and containers use subtle white/light borders (especially on the top and left edges) to simulate glass light reflection.
- **Vibrant Ambient Lighting:** The background features animated, large, floating "orbs" (glowing gradients) that softly bleed color through the glass UI elements.
- **Rounded Corners:** Extensive use of smooth, rounded corners (e.g., 16px for cards, 20px to 99px for buttons and badges).
- **Smooth Transitions:** Interactive elements feature micro-animations (e.g., `translateY`, `scale`, and glowing box shadows on hover).

2. Colors

The application relies on CSS variables for consistent theming.

Core Palette (Dark Mode - Default)

-  **Background** (`--c-bg`): #0f1117 (Deep space blue/black)
-  **Card Surface** (`--c-card`): #1a1c28 / rgba(15, 17, 23, 0.7)
-  **Text Primary** (`--c-light`): #F9FAFB (Off-white)
-  **Text Secondary** (`--c-sub`): #9CA3AF (Muted gray)
- **Borders**: rgba(255, 255, 255, 0.05) (Standard), rgba(255, 255, 255, 0.15) (Top/Left)

Accent Colors

-  **Primary**: #4f46e5 (Indigo)
-  **Orange** (`--c-orange`): #f97316 / #FB923C
-  **Yellow** (`--c-yellow`): #facc15 / #FBBF24
-  **Purple** (`--c-purple`): #8b5cf6
-  **Pink** (`--c-pink`): #ec4899
-  **Blue** (`--c-blue`): #3b82f6

Role-Based Color System

Uses CSS token inheritance via the `data-role="role_name"` attribute.

-  **Student**: #94A3B8 (Slate)
-  **Instructor**: #FB923C (Orange)
-  **Admin**: #8B5CF6 (Purple)
-  **Super Admin**: #EF4444 (Red)
-  **Revenue / Success**: #10B981 (Emerald / Green)

3. Typography

- **Font Family**: `system-ui, 'Segoe UI', Roboto, sans-serif`
- **Monospace**: `ui-monospace, Consolas, monospace`
- **Base Size**: 18px on desktop, 16px on mobile/tablet (max-width: 1024px).
- **Line Height**: 145% base.
- **Letter Spacing**: 0.18px base.

- **Headings:**
 - **Page Titles (H1):** 56px, font-weight: 500, letter-spacing: -1.68px.
 - **Section Titles (H2):** 24px, font-weight: 500, letter-spacing: -0.24px.
 - **Responsive:** H1 scales down to 36px, H2 scales down to 20px below 1024px.

4. Spacing System

- **Main Content Container:** Max-width of 1400px, centered.
- **Global Padding:** 140px top padding (clears fixed navbar), 32px horizontal padding.
- **Card Padding:** Standard inner padding for cards is 24px or 32px.
- **Gaps:** Flexbox/Grid gaps follow 16px or 24px increments.

5. Components

5.1 Buttons

- **Primary Glass Button (`.glass-btn`):** Linear gradient (135deg, Orange to Yellow), 20px border radius, 14px 24px padding, 700 font weight. Hover: orange/yellow glow, translateY(-3px) scale(1.02).
- **Action / Secondary Buttons (`.hover-glow`):** Transparent background, 1px solid role color border. Hover: rgba(255, 255, 255, 0.08) background, role-color border, translateY(-2px).

5.2 Cards (`.glass-card`)

- **Structure:** rgba(15, 17, 23, 0.7) background with `backdrop-filter: blur(20px)`.
- **Borders:** 0.05 opacity global border, 0.15 opacity top/left border (glass reflection).
- **Border Radius & Shadow:** 16px radius, warm shadow (0 4px 25px rgba(251, 146, 60, 0.15)).

5.3 Badges (`.role-badge`)

- **Structure:** Pill shape (999px radius), 4px 10px padding, 0.8rem text, capitalized.
- **Colors:** Text maps to `--role-color`, background to `--role-soft` (16% opacity).

5.4 Tables

- **Container:** Wrapped inside a `.glass-card`.

- **Styling:** Left-aligned headers (muted), 0.05 opacity bottom border for rows.
- **Hover:** Subtle highlight (rgba(255, 255, 255, 0.02)). Cells vertically centered.

5.5 Forms & Inputs

- **Background & Border:** rgba(255, 255, 255, 0.03) background, 0.1 opacity border.
- **Border Radius:** Pill (99px) or rounded (12px).
- **Focus State:** Outline removed globally, replaced by border color change or glow.

5.6 Navbar & 5.7 Sidebar

- **Navbar:** Fixed top, z-index 100, blur(20px) background. Elements: Logo, Search, Theme/Profile.
- **Sidebar:** Expanded (240px) or Collapsed (68px). Smooth 0.3s transition. Active item gets left indicator line and soft background gradient.

5.8 Modals

- **Structure:** Fixed backdrop, rgba(0,0,0,0.8) background. Centered flexbox. Modal is a `.glass-card` with entrance animation.

6. Animations

- **Ambient Background:** Large glowing orbs floating (20s-25s loop).
- **Hover Micro-Interactions:** 0.3s duration. Elements lift (-2px to -3px), shadows expand/glow.
- **Modals:** Scale up or translate up with opacity fade.

7. Responsive Rules

- **Tablet / Mobile:** Font drops to 16px, H1 to 36px. Sidebar collapses or becomes drawer. Flex rows wrap to columns.

8. Light & Dark Mode

Controlled via a `light-mode` class on the `<body>`.

- **Backgrounds:** Shift from dark `#0f1117` to soft gray `#e5e7eb` or `#f9fafb`.
- **Text:** Shifts to `#1f2937` and `#4b5563`.
- **Cards:** Shift to `rgba(255, 255, 255, 0.7)` (maintaining blur).
- **Borders/Shadows:** Dark transparent borders (0.1 opacity), soft black shadows instead of color glows.

9. Reusable Page Templates

- **Dashboard:** Grid/flex-row of `.glass-card.stat-card` at the top. Use role-based styling if applicable.
- **Management:** Header row (H2, Search, Action), Filter Tabs, large `.glass-card` for table, centered pagination.
- **Content/Form:** H2, single/split glass cards, stacked inputs (16px gap), right-aligned submit buttons.

10. Best Practices

- **Variables:** Always use `var(--c-...)` instead of hardcoded hex values.
- **Components:** Reuse the `glass-card` class for any container holding content.
- **Z-Index:** Navbar is 100. Modals 999. Dropdowns 50.
- **Roles:** Use `data-role="..."` to apply color themes scalably.
- **Performance:** Preserve blur limits; avoid deeply nested `backdrop-filter` elements.
